Fabi Barili

Game Designer | Systems Design & Problem Solving | KPIs & Mobile Games
Brazil

Summary

Senior Game Designer with over 5 years of experience in the mobile gaming industry. Expertise covers the full lifecycle of game development, from initial concept and systems design to global launch and live operations management.I design systems and solve core design problems to drive player retention, engagement, and revenue, effectively bridging the gap between creative vision and business goals.Core Expertise:• Design Problem Solving: Proven ability to identify and resolve complex design bottlenecks, optimize systems, and refine mechanics to elevate the player experience.• Full-Cycle & Feature Ownership: Experienced in driving feature development from scratch and auditing legacy systems to improve KPIs in live environments.• Systems & Productivity Tools: Development of custom Level Design and balancing tools (Unity, Google Sheets, and AI-driven workflows) to streamline technical production and accelerate content delivery.• Data-Informed Design: Collaboration with Producers and Data Analysts to run A/B tests, rebalance economies, and optimize features based on live performance metrics.Technical Toolkit:• Engines and Design: Unity, Figma, Miro.• Data and Management: Google Sheets (Advanced Modeling), Game Analytics, Asana.• Methods: A/B Testing, Data-informed Design, Competitive Benchmarking.Languages:• English (Professional Working Proficiency)• Spanish (Advanced)• Portuguese (Native)• Email: fabibarili@gmail.com• Portfolio: https://www.behance.net/fabibarili

Experience

Infinity Games

Mid-Level Game Designer
October 2023 - Present (3 years 2 months)
Portugal

• Designed and owned new features from concept to implementation, focusing on player retention and continuous UI/UX improvements.

• Managed Game Balance and economy modeling using advanced Google Sheets workflows to streamline game progression.
• Developed and executed Monetization Strategies and LiveOps events for live titles scaled to thousands of concurrent players.
• Utilized Game Analytics and KPIs to drive data-informed decisions, running A/B Testing to validate features and optimize product performance.
• Conducted market benchmarking to identify industry trends and integrate competitive best practices into development.
• Built custom productivity tools to accelerate development pipelines and optimize workflows across different areas.
• Collaborated within international, multidisciplinary teams to solve complex design bottlenecks and sustain high-performing live products.

Tapps Games

Game Designer

May 2021 - October 2023 (2 years 6 months)
São Paulo, Brazil

• Designed core mechanics, progression, and underlying game architecture through comprehensive System Design.
• Conceptualized and delivered new features from ideation to production, aligning creative direction with player engagement goals.
• Created interactive mockups and user flows via Prototyping with Figma to refine UI/UX and align multidisciplinary teams.
• Structured Game Balance systems, mathematical models, and economy tuning to ensure sustainable game progression.
• Formulated and integrated data-driven Monetization Strategies to drive revenue and maximize lifetime value (LTV).
• Conducted A/B Testing and monitored performance metrics to validate features, resolve design bottlenecks, and iterate based on live player behavior.

Hogarth

Game Developer

April 2019 - May 2021 (2 years 2 months)
Porto Alegre e Região, Brasil

Responsibilities:
- Game Development with Unity 3D and Unreal;
- XR development;
- 360 web experience using React VR;
- Gamification;
- Game Design;

- Level Design.

Senac RS
Teacher
August 2018 - April 2019 (9 months)
Porto Alegre e Região, Brasil

Classes in the course Digital Games about:

- Game Design;
- Programming using Unity;
- Project management.

Freelancer
Game Designer, Game Developer
January 2017 - April 2019 (2 years 4 months)
Porto Alegre e Região, Brasil

- Game Development;
- Virtual reality, augmented reality simulation and health.

Universidade Feevale
Researcher
January 2016 - January 2019 (3 years 1 month)

Researcher with interested in games, health, virtual reality and augmented reality.

Education

Universidade Feevale
Master's degree, Creative Industry · (2016 - 2018)

Universidade Positivo
Master of Business Administration - MBA, Game Design · (2020 - 2021)

Universidade Nacional da Colômbia
Master in Computer Systems Administration, Organizational Application Management · (2017 - 2017)

Universidade Feevale
University Graduate, Digital Games · (2011 - 2015)
